# USER MANUAL FOR

Plustek Barcode Reader is an additional program from Plustek DocAction which serves to read Barcodes on scanned documents. This software allows naming scanned files with Barcode code.

Step Configuration Plustek Barcode Reader

There are 3 steps in the configuration:

1. Copy the Plustek Barcode Reader file
2. Setting the application Plustek DocAction
3. Scan documents that have a Barcode

I. Copy file of Plustek Barcode Reader

II. Setting the Application Plustek DocAction

The next step is to make settings on the main application of the Plustek scanner which is DocAction.

1. Through "Start" -> "All Programs" -> search for Plustek Scanner program.

2. Through the "tray icon" found on the bottom right of your desktop.

Display DocAction Configuration

1. Select the profile button that will be used to scan Barcode documents.
2. Change the Template Button to "Scan Utility".
3. In the Application panel, press the "Add" button until the "Add / Modify Linked Application" screen appears.
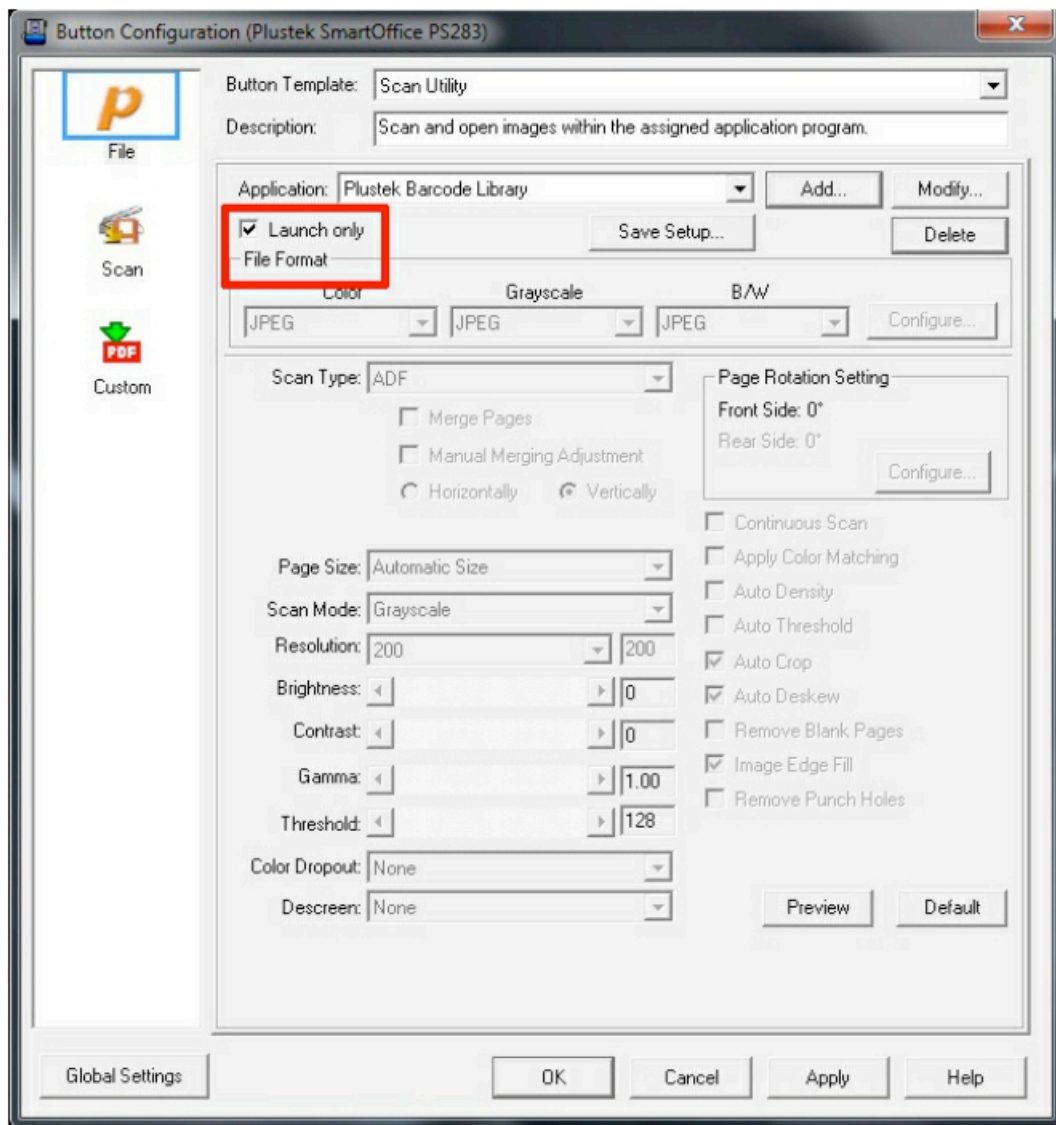

4. In the "Add / Modify Linked Application" section, press Button (...) to navigate to application "PlkScan.exe".
This app is in the folder: C: \ Plustek Barcode Reader \ PlkScan_20160711.
If so, press "Ok".

5. Fill in the "Add / Modify Linked Application" screen as follows:
- Name   : Plustek Barcode Reader
- Memo   : <Empty>
- Command Line   : <Empty>

Then click "Ok".

When finished configuring in the Application panel, do not forget to enable the "Launch Only" feature and press the "Apply" or "Ok" button.

III. Scan documents that have Barcodes

After completing the configuration, the last step is to scan a document that has a barcode using a scan button that has been set.

The scan will be saved directly to the "ScanDoc" folder. This folder can be accessed via Desktop or access the following URL:
C: \ Users \ Public \ Documents \ ScanDoc \ (Windows 7, 8, or 10) C: \ Documents and Settings \ All Users \ Documents \ ScanDoc \ (Windows XP)

Good luck!

Plustek Scanner! solution for your digital documents!

Note: The scan of Barcode Library is a Grayscale PDF with 300 dpi resolution.
